The double horizontal lifting table is ideal for lifting long items and heavy duty lifting. The lifting table has a low closed height compared to platform size.

A lifting table improves both efficiency and productivity while relieving your employees from everyday stresses caused by bending and lifting. A lifting table can provide a solution whenever heavy lifting, awkward working positions and height variations is a challenge.

Our standard program has numerous types of lifting tables that each can be adapted to exactly suit your work flow needs. See our standard double horizontal models on the following page or find more information at www.translyft.com/uk/.

The lifting tables can be equipped with many different options such as roller conveyor.

A double horizontal table is also popular to use as a work platform and can e.g. be equipped with rails, stairs and truck sleeve.
