The TRANSLYFT double scissor lift is perfect when you just need that bit more height. Double vertical action for general material handling between levels, conveyor lifting, machine in and out-feed, pallet loading and packing lines.

A lifting table improves both efficiency and productivity while relieving your employees from everyday stresses caused by bending and lifting. A lifting table can provide a solution whenever heavy lifting, awkward working positions and height variations is a challenge.

See our standard double scissor models on the next page or find out more at [www.translyft.com/uk/](http://www.translyft.com/uk/)

Lifting tables can easily be constructed and set up as part of a packing line.

The lifting tables can be equipped with many different options such as a truck sleeve.

All lifts can be produced in ATEX, Hygienic Design, galvanized steel, stainless steel or a painted solution.
