Our Mastlift can be used at several levels and is available with many different functions. Among other things, smaller/larger platform and high travel. The Mastlift can either be mounted on existing walls or be self-supporting with doors incl. interlocks.

The Mastlift construction is strong and stable and is easy to maintain and service. The lift is freestanding e.g. in locked machine cabinet.

More information at www.translyft.com

The Mastlift is fitted with our freight elevator control which includes autolevel system and soft start / stop.

Contact us for specialized solutions in e.g. stainless steel, ATEX, or customized measurements.

The Mastlift is ideal for general material handling between floors, and we can deliver it in the size you require.

Type/Capacity kg	Travel mm	Closed height mm	Length mm	Width mm	Lift time mm per sec	Motor kW
Mastlifts						
MTL 600	0 - 3250*	120**	1400	1200	45	2,2
MTL 1200	0 - 3000*	120**	1400	1200	60	4,0

* Further travel up to 8000.

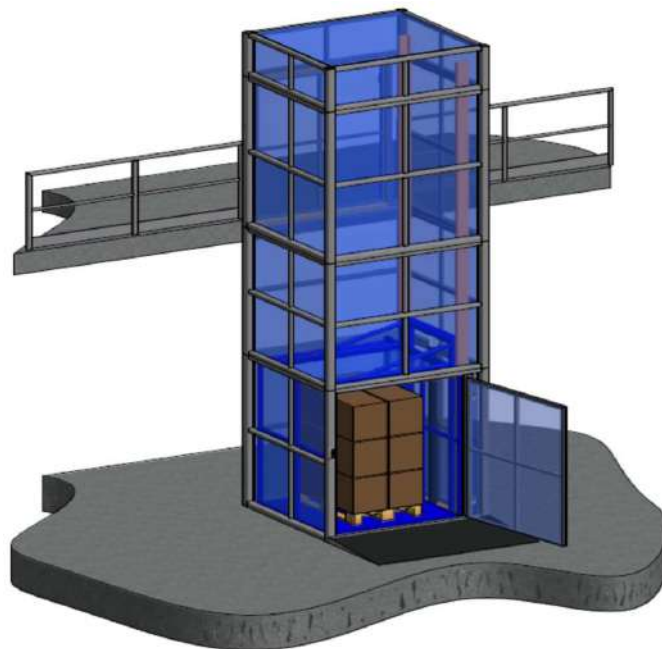

** We recommend a pit level of 170 mm but the mastlift has a low installation height which means that it can be installed with a ramp instead of a pit.

Features include:

- > Up to 8 meters multi levels
- > No need for a machine room
- > Can be made for no pit or building work required
- > Fast and easy installation
- > Maximum space saving

Ideal for the following applications:

- > Between Fixed Levels in Buildings
- > Pallet Handling to / from Mezzanine Floors
- > General Materials Handling Between Floors

We know that every lift is unique and that all workspaces are different.
