Significantly better hygiene level
up to 50% savings in terms of
cleaning time and cost

The TRANSLYFT Hygienic Design for smoke trolleys is a premium stainless steel lifting solution that reassures a better hygiene chain and a more efficient work place. The solution can withstand intensive cleaning.

The cleaning mode makes it possible to raise the platform resulting in more efficient cleaning and a significantly better hygiene level. Consequently, you save both time, water and detergent during the cleaning process (see test result from test in box by above picture).

The TRANSLYFT Hygienic Design smoke trolley solutions can be customized for your needs. Read more about our Hygienic Design at www.translyft.com

The wheel gaps make sure that the smoke trolley does not move when lifting and lowering

The platform can be equipped with slots to further ease the cleaning process.

The lifting table is equipped with ramps to make it easy to roll the smoke trolley on and of the table.

Type/Capacity kg	Travel mm	Closed height mm	Total raised height mm	Length mm	Width mm	Lift time sec	Motor kW	Weight kg
HL 1000 B	830	180	1010	1300	800	18	0.75	175
HL 1000 F	830	180	1010	1300	1000	18	0.75	180

How to get the smoke trolley lifting table in cleaning position

1: The table in top position

2: Run the table down

3: Roll the smoke trolley of

4: Put table in cleaning position

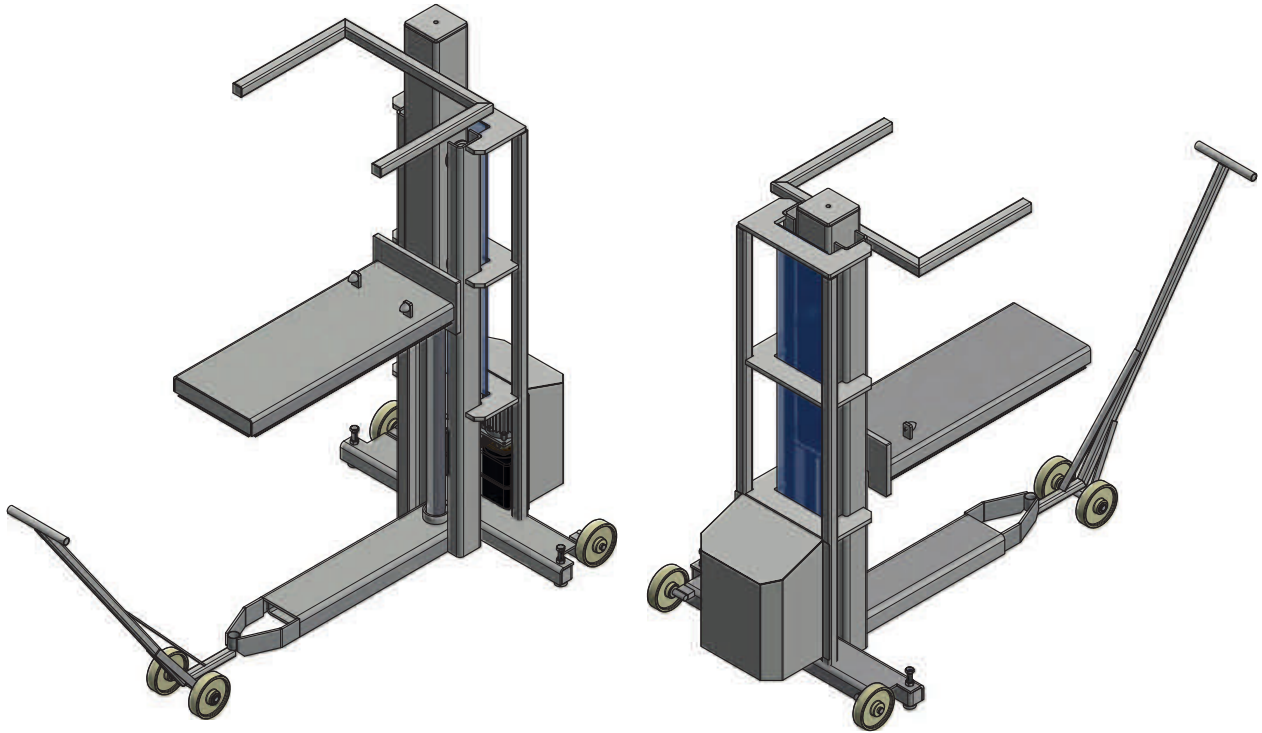

5: Run the table down

6: Ready to clean

MOVEABLE ROLL CAGE LIFTER

IDEEL FOR THE FOOD INDUSTRY

Our new moveable roll cage lifter is a compact machine that allows you to move roll cages ergonomically onto the lifter. Avoid pulling and pushing. Just leave the roll cage directly on top of the roll cage lifter and it is in position to be lifted.

The Roll cage lifter takes up very little space and is moveable making it perfect for smaller and interchangeable workspaces.

The width of the lifting platform is perfect for most roll cages in the food industry.
